## Sarah's Stitches

by Sarah W

As we turn to the last quarter of this strange year I have been reflecting on all the things we have missed and all the things we still probably won't be able to do in the next few months. While we have not been able to meet in person I have loved being able to connect with you on Zoom, spending time and learning more about some members, actually being able to knit with others that I hadn't been able to before and seeing how creative you all are. As the nights start to draw in earlier please remember the Zoom session is open weekdays from about 6pm (work allowing). Let other members know when you will be online and hang out together with me.

As the year comes to an end we have to carry on with Guild management so we are looking for volunteers for the nominating committee. Your attendance at the meeting will become important as the year finishes. We need at least 35 people on the meeting to form a quorum so Please mark you diary/ add that post it to the fridge / do whatever you need to in order to remember to attend.

Keep well, safe and most importantly keep knitting

## October 2020 VP Programs

VP Programs, Lenora Francois Stewart

If you are like me, you have baked all the bread that you waistband can handle. You've cleaned the pantry of all the canned goods you bought back in 2015. And your pile of handmade items for charity could be the beginning of an Etsy store.
